WEB SITE NAME: BON VOYAGE

TOPIC: TRAVEL SITE

What is our purpose?

We wanted to make a site that guides people who want to go to Amsterdam to complete their work before starting the journey and to do activities during their trip.

Bon Voyage means have a good journey. Like the name of our page, we aimed to ensure that our users can get information about the city before they go and make their plans according to the city by seeing the places to visit so that they can have a good trip. If they want to start the process to go and do not know where to start, they will find their answers on our site.

Before we created this site, *during our conversations with people around us*, we realized that people needed a travel guide in the countries or cities they went to. It is not correct to limit this as only places to visit. What attracts people to go to that country or city is sometimes its history and culture, sometimes its atmosphere, and sometimes its natural beauties. This site will be a complete guide for them.

Who are our users and what are their characteristic features ?

People of all ages who want to visit can use this site easily. There are no physical limitations. The characteristic features of our users are primarily that they are curious to travel. People who love to do research and acquire new information will enjoy our site very much. But this does not mean that it is suitable only for users who want to learn about a particular topic. It has an easy-to-use design for people of all ages to use.

What are the users' works?

This site, which we designed responsive, was made through HTML CSS and JAVASCRIPT. Our menu icon that appears when our site page, which is organized according to gather requirements, is minimized, and all other used icons are commonly used icons. Because people know the purpose and use of these icons and the feedback they use, they become eligible for visibility and affordance and feedback requirements. That's why we use *gather requirements* for our site.

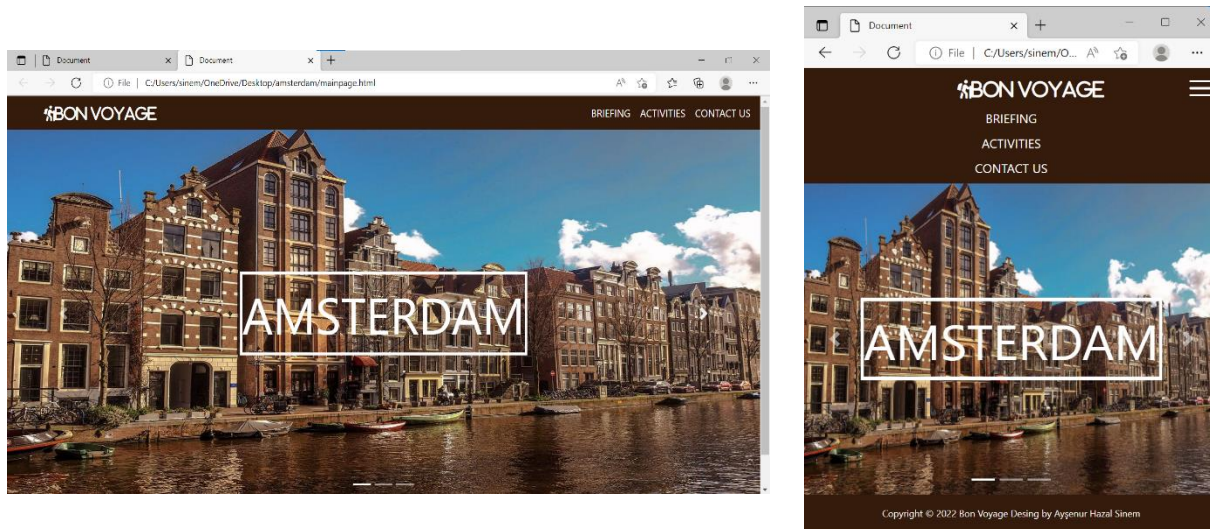

FOR FIRST PAGE

First of all, our logo on every page welcomes the users.

Since the purpose of our first page is to create a simple and understandable home page, we have created a simple navbar with a sidebar consisting of pictures that draw the user in.

We made sure that this page was responsive. Thus, If the user is browsing our site from large screens, our menu can be seen in full at the top. but people entering from small screens encounter the menu icon. so by clicking on the icon they display our menu.

The first thing that draws attention when you enter our site is actually the slide bar. The user can control the slide bar made with Bootstrap in 2 ways. The first method is to move forward with the next and prev buttons on the sides. The second method is to display the photos in the desired sequence with the buttons under the slide bar.

We have finished our introduction page with the footer section under the slide bar.

FOR SECOND PAGE

Our on this page is to inform the user about the city. Users who want to go to Amsterdam while learning new things about its history can easily handle their hotel booking, visa and ticket transactions on our page.

When you open the page, a banner that appears under the navbar welcomes you. Thus, we focus the user's focus on the subject and the page a little more.

When you scroll down the page a little bit, the time and weather conditions of Amsterdam greet you. Thus, people who are planning to go to Amsterdam can arrange themselves.

Then, thanks to the sliding boxes we have created, you are greeted with a brief summary of the second page. The floating boxes actually act like a menu that sends you to the relevant sections of the page.

The contents in it are the history of Amsterdam, natural beauties, ticket and visa procedures.

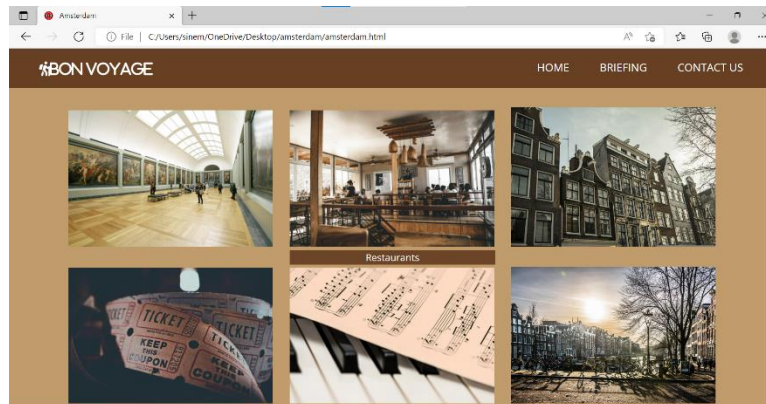

A screenshot of a web browser window displaying two forms side-by-side. The left form is titled "HOTEL BOOKING" and contains fields for NAME, SURNAME, EMAIL, PHONE NUMBER, ARRIVE, DEPART, PEOPLE, BED, and ROOM, with a "SEARCH" button at the bottom. The right form is titled "PLANE TICKET" and contains fields for NAME, SURNAME, EMAIL, PHONE NUMBER, FROM, TO, PEOPLE, DEPART, and TIME, with a "SEARCH" button at the bottom.

The map at the end of the page gives the location of Amsterdam.

Thus, our 2nd page is finished.

FOR THIRD PAGE

When you open our third page, we welcome you again with our box menu. Since there may be users who do not understand the usage at first glance, you can navigate to the page you want with hover effects when you hover over the boxes. The purpose of this page is more to adopt and gain knowledge of Amsterdam culturally. The contents you can access are museums, restaurants, popular places, movies, music and vlogs.

As a result of the information obtained in the restaurants section, we direct the user to the necessary sites so that he can reserve the restaurant he likes.

In the popular places section, the user can see the location of the places and make their plans.

In the movies section, the user can access information about the movie and its IMDB score with the hover effect that appears when hovering over the posters of the movies, and they are directed to the required page for more information.

The music section has recommendations for users who are more interested in the culture of Amsterdam.

The vlog part is a good alternative for users who want to feel like they are in Amsterdam while having fun.

This page also responsive.

Thus, our 3rd page is finished.

FOR FOURTH PAGE

Our fourth and last page, the contact us page, we have created so that users can write their requests and complaints in general and reach us.

Our Information

For years, we have been working diligently to provide you with the information you want about the cities you have traveled to. If you fill in the information on the left, we can get back to you immediately and make a very good travel plan by making your travel planning together. You can always reach us from the information below and send your questions. Thank you for choosing us.

Phone Number: +905551234567
Fax Number: +1-212-9876543
Our Mail Address: bonvoyage@gmail.com
Social Media:

Thus, our web site is finished.

This assignment was done entirely by group work. Each page was made together.
